AI Dispute Diagnosis

Main reason: Most overdue disputes are stuck in customer evidence wait and merchant/acquirer response.
What changed: Cycling rose to 28%, driven by reopened dispute follow-ups and provisional-credit confusion.
Fix first: Route HSHF aged disputes in-house, trigger evidence reminders, and escalate merchant-wait cases older than 5 days.

Top Service Failures

Ranked by conversation volume, repeat contact, and sentiment impact.

#1 Dispute follow-up
Segment most affected: HSHF
3,628 conv. 47% repeat -0.58 sent.

#2 Fee waiver
Segment most affected: HSHF
1,820 conv. 54% repeat -0.52 sent.

Vol: 8 Avg: 30d+ Sent: -0.78

Critical

✦ Evidence pending is the operational bottleneck. Sentiment collapses once cases move toward final decision and escalation risk.
