Each contact and each public item counts once, under its main theme, so the categories add up to the issue pulse: resolved + open + waiting on customer = volume. Waiting on customer: the bank has sent a resolution or proposed one; not counted as open or as not responded to. Not responded to in 48h+: waited more than 48 hours for a first reply. Escalations: internal contacts escalated to a grievance desk or beyond; external posts with escalation language. Trend: internal plus public volume over the last 8 periods of the same length. TAT-related: the category carries a delivery timeline; compliance is not shown here. Owners are roles in the cards team. The at-risk pill counts complaints on the Ombudsman watch (internal, illustrative).

Public · live

Are my customers happy?

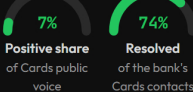

Sentiment · Trust pillars · Top pain

Net sentiment of Cards public voice is -69 (-14 pts vs previous period), source-weighted. Card variant migration and forced upgrade draws the most negative posts.

NET SENTIMENT

-69

668 public items about Cards in the period. Positive share minus negative share, each source weighted by its share of the window.

TOP PAIN

Card variant migration and forced upgrade

46 negative items

CLOSURE INTENT
